HEADLIGHTS

The new UTV headlight system is designed for tough conditions. Manufactured with reinforced fiberglass charged plastic and hardened clear glass, the UTV headlight system will enhance your visibility when clearing snow. Experience superior light output with a 55 watt halogen bulb that is easily replaced by opening the front to change the bulb.

STANDARD EQUIPMENT

OPTIONAL EQUIPMENT

GROUND CLEARANCE

Not only did we make the sloped-profile Undercarriage rugged and tough, but we also made sure to not decrease your ground clearance. That means, when your BOSS UTV plow is not attached, your UTV remains the tough, off-road-capable vehicle you need.

UTV HYDRAULICS

THE BOSS UTV Plows come standard with a hydraulic system designed for maximum blade lift, and higher snow stacking. An enclosed hydraulic system delivers speed and reliability and is protected from the elements to prevent corrosion and hydraulic freeze-up.
